SUMMARY

A passionate software developer eager to try anything and learn new skills to better myself. I am also ready to share the skills I have to help others and improve the tech community at large.

My charismatic personality makes me an approachable, reliable and efficient team player, able to achieve both personal and corporate goals — supported by strong time-management skills.

SKILLS

Languages: Java, Python

Frameworks: Spring Boot, Django, Flask

Database: SQL, MySQL, PostgreSQL, Oracle

Web/Front-end: HTML, CSS, JavaScript, Bootstrap

Integration & Testing: REST APIs, JSON, HTTP/HTTPS, Postman, Swagger/API Docs

Application Servers & OS: Apache Tomcat, Windows, command-line tools

Tools: Git, IDEs (IntelliJ IDEA, VS Code), Africa's Talking, Ngrok

Support & Ops: Application logs, troubleshooting, monitoring, UAT

Soft Skills: Team Collaboration, Problem Solving, Time Management

EXPERIENCE

Software Developer Intern | E&M Technology House

June 2026 – September 2026

- Worked as a software development intern, contributing to ongoing development and support tasks within the team.

Junior Software Developer & Treasurer (Attaché) | Three Quality Services Limited

January 2025 – December 2025

- Development of service codes.
- Development and designing of websites.
- Drone technology.
- Financial record keeping.
- Doing clerical work.

Polling Clerk | Independent Electoral and Boundaries Commission (IEBC)

December 2022

- Issuing of ballot papers.
- Voter verification using the KIEMS kit by matching biometric data against the database.
- Preparing the polling station for polling day.
- Any other polling station duty assigned by the presiding officer.

PROJECTS

InsightFlow (Hackathon Project — 2nd Place)

- An AI-powered system that collects scattered data from various sources (e.g. photos, Google Docs, CSVs), unifies and cleans it, and represents it as dashboards with AI-generated insights and reports for donors.
- Built to ease donor reporting for organisations such as PLP, which run multiple programs across different counties, time periods and beneficiary groups — enabling a program manager to generate an insight-rich donor report in seconds instead of compiling it manually.
- Placed 2nd in the hackathon competition it was developed for.

Distributor Financing System

- A multi-tenant platform (built with Java and Spring Boot) that bridges the financing gap between manufacturers and distributors: manufacturers have goods ready to sell but distributors sometimes face financial shortages that prevent them from purchasing.
- The bank steps in and pays the manufacturer on behalf of the distributor; once the distributor sells the goods, they repay the bank.
- Covers onboarding of banks, manufacturers and distributors, loan disbursement approval chains, repayments, and notifications, with API documentation via Swagger.

Anthill Travel Solutions

- A school project for the Server-Side Scripting Language unit, built with PHP and MySQL, for a travel start-up that needed a marketing website.
- Implemented bulk promotional and advertising SMS messaging to registered customers.

Artlink Entertainment Platform

- A community sharing and promotional platform for artists, built with PHP and MySQL.
- Artists post artwork (images and videos); artistic institutions such as museums collaborate with artists; audiences follow and message artists in real time.

USSD SACCO Service

- A USSD short service code for a SACCO serving farmers in remote areas, letting members register and access deposits, withdrawals and enquiries.
- Built with Python, Flask and MySQL (via SQLAlchemy); Africa's Talking provided API keys for testing and Ngrok exposed the local server; Postman was used for API testing.

EDUCATION

June 2026 – September 2026	Power Learn Project	Data Analytics	In Progress
May 2025 – January 2026	ALX	Backend Development	Pass
Sept 2021 – Dec 2025	Kabarak University	Computer Science	2nd Class Lower
2017 – 2020	Kisumu Girls High School	—	B+

REFEREES

Ruth Wangui — Human Resource Management, Three Quality Services

P.O. Box 25523 – 00100 Nairobi | 0722 471 619

Dennis Mabonga — Business Developer, 3D Africa Communications

P.O. Box 28225 – 00100 Nairobi | 0790 738 933

Crispus Alukwe — Lecturer, Kabarak University

Private Bag 20157, Nakuru | 0780 474 923
